

Statement regarding partial revocation export license

January 1, 2024

Veldhoven, the Netherlands

A license for the shipment of NXT:2050i and NXT:2100i lithography systems in 2023 has recently been partially revoked by the Dutch government, impacting a small number of customers in China.

We do not expect the current revocation of our export license or the latest U.S. export control restrictions to have a material impact on our financial outlook for 2023.

In recent discussions with the US government, ASML has obtained further clarification of the scope and impact of the US export control regulations. The latest US export rules (published October 17, 2023) impose restrictions on certain mid critical DUV immersion lithography systems for a limited number of advanced production facilities.

ASML is fully committed to comply with all applicable laws and regulations including export control legislation in the countries in which we operate.

About ASML

ASML is a leading supplier to the semiconductor industry. The company provides chipmakers with hardware, software and services to mass produce the patterns of integrated circuits (microchips). Together with its partners, ASML drives the advancement of more affordable, more powerful, more energy-efficient microchips. ASML enables groundbreaking technology to solve some of humanity's toughest challenges, such as in healthcare, energy use and conservation, mobility and agriculture. ASML is a multinational company headquartered in Veldhoven, the Netherlands, with offices across Europe, the US and Asia. Every day, ASML's more than 41,500 employees (FTE) challenge the status quo and push technology to new limits. ASML is traded on Euronext Amsterdam and NASDAQ under the symbol ASML. Discover ASML – our products, technology and career opportunities – at www.asml.com.
