Statement regarding US government's export control regulations announcement

October 17, 2023

Veldhoven, the Netherlands

Today, the US authorities published the updated version of the advanced computing and semiconductor manufacturing equipment rule, imposing additional restrictions on export of advanced chip manufacturing technology. These regulations will become effective after a period of 30 days.

Given the length and complexity of the regulations, ASML will need to carefully assess any potential implications. However, as to our business, from the information we received, it is our understanding that the new regulations will be applicable to a limited number of fabs in China related to advanced semiconductor manufacturing.

These export control measures will likely have an impact on the regional split of our systems sales in the medium to long term. However, we do not expect these measures to have a material impact on our financial outlook for 2023 and for our longer-term scenarios for 2025 and 2030, as communicated during our Investor Day in November 2022.

Our view on 2024 as presented in our Q3 press release includes these developments around export controls.

ASML will seek further clarification from the US authorities on the scope of these new regulations. ASML is fully committed to comply with all applicable laws and regulations including export control legislation in the countries in which we operate.

About ASML

ASML is a leading supplier to the semiconductor industry. The company provides chipmakers with hardware, software and services to mass produce the patterns of integrated circuits (microchips). Together with its partners, ASML drives the advancement of more affordable, more powerful, more energy-efficient microchips. ASML enables groundbreaking technology to solve some of humanity's toughest challenges, such as in healthcare, energy use and conservation, mobility and agriculture. ASML is a multinational company headquartered in Veldhoven, the Netherlands, with offices across Europe, the US and Asia. Every day, ASML's more than 41,500 employees (FTE) challenge the status quo and push technology to new limits. ASML is traded on Euronext Amsterdam and NASDAQ under the symbol ASML.
